

HOW TO HELP THE EXCITABLE PUPPY

1

When the leash goes tight, it's a red light

Pause and help your puppy make a better choice. If you keep walking, you are actually training them to pull more!

If your puppy is over stimulated, they can't learn. *Move away from the distractions until your pup settles down.*

2

Distance is your friend

3

Reward the calm

Create value in looking toward you for guidance. Three to five minute training sessions work best.

Help others reward acceptable behavior from your puppy. Puppies should only receive attention when doing something you want them to do more often. Otherwise, they have trained YOU!

4

4 on the floor, pet some more!
